

CoVIR case study: Suckling Transport initiatives and outcomes

Dr Will Murray
www.vfrm.net

CoVIR case initiatives

- Small (<50 vehicles) highly proactive and safety conscious transport company involved in the petro-chemical industry
- Attended university of Huddersfield workshop on transport safety which led to involvement in the CoVIR project
- Saw dramatic safety improvements after implementing CoVIR recommendations:
 - bump card
 - Database for monitoring
 - disposable cameras
 - potential incident report cards
- Also introduced 'Year of Living Safely' campaign as part of its membership of Brake's Fleet Safety Forum

CoVIR case study outcomes
